Positive Factors (points added)		
0	Have issued a good state “Bicycle Drivers' Manual” and/or --- Drivers Handbook has vehicular cycling info. The state has <i>A Guide to North Carolina Bicycle and Pedestrian Laws</i> http://www.ncdot.org/transit/bicycle/laws/resources/lawsguidebook.html . Unfortunately, this is ruined by uninformed interpretations of state law that could jeopardize the rights of a cyclist injured by a negligent motorist. NC has a "contributory negligence" law that bars a plaintiff from recovery if he "contributed" even one percent to the accident. On page 8, the <i>Guide</i> says: “ However, no matter how well equipped bicyclists might be using lights, reflectors, reflector vest, and flashing LED lights, they should always use extreme caution while riding at night and only do so when necessary. ” This language suggests that riding in the dark is “extremely dangerous”. It could trigger the contributory negligence clause. Also, on page 8, under “Riding on the Right” it says, “ Also, the bicyclist must travel in the right-hand lane and should ride as close as practicable to the right hand edge of the highway. ” Besides encouraging unsafe lane position, the <i>Guide</i> misquoted state law. NC does not have the “far right rule”. The <i>Guide</i> implies that it does.	[up to +15]
